Dear Parents and Guardians,

As a part of the Grade 5 Social Studies curriculum, students will be exploring the different regions of Canada. We have gone through different learning stations already to gain some initial insights to the six regions. To get a real life understanding of the regions, students will be connecting with a group of Grade 6 students from Kugluktuk High School, in Kugluktuk Nunavut, via letter and video conferencing.

In addition to learning about the regions, the project is structured in ways that allow Nose Creek students to work through math concepts such as addition and subtraction of decimals, as well as area, perimeter and volume.

We hope that this will give our students, and the students at Kugluktuk High School, a more personal perspective on the similarities and difference between our regions.

If you have any questions, concerns, or wish that your child does not partake in this exciting learning opportunity, please don't hesitate to contact me via email (kgmalayko@cbe.ab.ca).

Sincerely,

Kate Malayko

Grade 5 Learning Leader
